

eLearning: How to Make a PBJ Course, Job Aid, and Instructor's Guide

Issue This course was created to demonstrate my instructional design abilities. The purpose of the course was to train someone to make a peanut butter and jelly sandwich.

Solution I chose to create an online course using Storyline and Captivate. The course can be reviewed at: <https://tinyurl.com/PBJCourse>.
Additionally, I created a job aid to accompany the course as well as an instructor's guide. See pages 2 – 3 for the instructor's guide and pages 4 – 5 for the job aid.

Results Everyone who took the course was able to make a peanut butter and jelly sandwich.

Classifications The table below lists two classifications and the recipients of this work sample.

Performance Experience Design¹	Characteristics²	Recipients
Innovative	eLearning software and design	General public
Meaningful
